Istruzioni per l'uso del pannello del computer Bluetooth KY030BT

1. Inserire i cavi negli accessori corrispondenti secondo le etichette e collegare il dispositivo all'alimentazione.
2. Premere un pulsante qualsiasi per accendere il dispositivo. Il display LCD si accende e il pannello del computer è acceso.
3. Premere il pulsante della ventola  per accendere la ventola. Il simbolo della ventola si accende. Premere nuovamente il pulsante della ventola per spegnerla. Il simbolo della ventola si spegne.
4. Premere il pulsante della luce  per accendere la plafoniera. Premere nuovamente il pulsante per spegnere la plafoniera.
5. Premere il pulsante radio/Bluetooth  per accendere la radio. Utilizzare i tasti  e  destra per cambiare la frequenza o passare al brano successivo. La frequenza della stazione radio è visualizzata nella parte superiore del display LCD. Utilizzare i pulsanti del volume   per regolare il volume. Il livello del volume è visualizzato su entrambi i lati del display della frequenza.
6. Premere nuovamente il pulsante radio/Bluetooth per passare alla modalità Bluetooth. Collegare il telefono cellulare o il dispositivo Bluetooth al pannello del computer. Una volta collegato, è possibile ascoltare musica o altri contenuti audio tramite il pannello del computer.
7. Premere il pulsante radio/Bluetooth una terza volta per disattivare la funzione Bluetooth/radio.
8. Premere l'interruttore On/Off per disattivare tutte le funzioni del pannello del computer. Il display LCD si spegne.
